

ONE

OUT OF EVERY 200 PERSONS
is an epileptic. Economic
loss, measured in money, is
tremendous — amounting
to \$60,000,000 annually.*

PARKE, DAVIS & COMPANY

**DETROIT 32
MICHIGAN**

The toll is alarmingly higher when seizures occur at sports cars and crowded bars. It is being reduced with DILANTIN SODIUM, the modern, superior anticonvulsant.

DILANTIN SODIUM affords the epileptic patient a more normal productive life, for it reduces the number or severity of convulsive seizures. In addition to being comparatively free from the undesirable effects of the bromides and barbiturates.

DILANTIN SODIUM

DILANTIN SODIUM (Diphenylhydantoin Sodium) is available in Kapseals of 0.03 Gm. ($\frac{1}{2}$ gr.), and 0.1 Gm. ($1\frac{1}{2}$ gr.), in bottles of 100, 500, and 1000.

*Yahrnes, Herbert: Epilepsy — The Ghost Is Out of the Closet, Public Affairs Pamphlet No. 98.

DILANTIN SODIUM

Old enough to be his grand-folks -- yet the physician's kindly understanding of their geriatric problems inspires their fullest confidence.

Essential to the physician's confident manner is his reliance on medicines of unvarying quality. His confidence is well-placed when his prescriptions specify "Warren-Teed."

Demerol hydrochloride, administered from thirty to ninety minutes pre-operatively, relieves much of the surgical patient's apprehension and reduces the amount of anesthetic agent required to obtain a given depth of narcosis. The average preoperative dose for adults is 100 mg. injected intramuscularly, which may be combined with scopolamine or a barbiturate to assure amnesia.

Compared with morphine, Demerol causes considerably less nausea and vomiting, and the danger of respiratory depression is greatly reduced. Unlike morphine, Demerol does not interfere with the cough reflex or the reflexes and size of the pupil. It does not cause constipation, and urinary retention is less than with morphine.

Postoperatively, Demerol is a reliable analgesic in the majority of cases, regardless of the type of surgery or the severity of pain. Patients in the older age group, in particular, respond most favorably to this drug. The average postoperative dose for adults varies from 50 to 100 mg., administered by intramuscular injection or by mouth.

When Vitamins Are Not Enough

In malnutrition, convalescence, anorexia and old age, more than vitamins are often indicated. Besides vitamins there are maltose, dextrose and dextrans and other food elements present in Maltine with Vitamin Concentrates.

Some of the food elements in Maltine with Vitamin Concentrates—
approximate content per 30 cc. (2 tablespoonfuls).

VITAMIN A	10,000 U.S.P. units
VITAMIN D	1,000 U.S.P. units
THIAMINE HYDROCHLORIDE	3 mg.
RIBOFLAVIN	4 mg.
NICOTINAMIDE	40 mg.
+ MALTOSE	9.6 gm.
+ DEXTROSE	4.2 gm.
+ DEXTRANS	10.2 gm.
+ PHOSPHORUS	279 mg.
+ CALCIUM	303 mg.
+ CHOLINE*	36 mg.
+ INOSITOL*	44 mg.
+ FOLIC ACID*	22 mcg.

*These constituents are members of the natural B Complex. Their need in human nutrition has not been established.

Two tablespoonfuls supply at least twice the minimum daily requirements of the above vitamins and supplementation of other easily digested food elements. The Maltine Company, New York 22.

MALTINE WITH VITAMIN CONCENTRATES

. . . MORE THAN A CAPSULE COULD HOLD

Now there are 6
BAXTER DEXTROSE SOLUTIONS WITH VITAMINS

FOR prophylaxis against certain B-vitamin deficiencies arising
 in dextrose therapy, Baxter now offers six TRINIDEX
 solutions—dextrose with the vitamins thiamine, riboflavin, and
 nicotinamide:

- 5% Dextrose in Isotonic Solution of Sodium Chloride;
- 10% Dextrose in Isotonic Solution of Sodium Chloride;
- 5% Dextrose in Distilled Water;
- 10% Dextrose in Distilled Water;
- 5% Alcohol and 5% Dextrose in Isotonic Solution of
Sodium Chloride;
- 5% Alcohol and 5% Dextrose in Distilled Water.

FULL COLOR HUMAN INTEREST GOOD POSTURE CHART expressly designed for physicians' offices, clinics and health centers. One of four in the new 1946 group added to the standard series to the standard series widely distributed in schools, colleges, industrial plants, "Y's" and similar outlets. Write for your office copy of this educational chart on your professional letterhead. **SAMUEL HIGBY CAMP INSTITUTE FOR BETTER POSTURE**, Empire State Building, New York 1, N. Y.

May 6 to 11 **CAMP** 8th Annual NATIONAL POSTURE WEEK

Once again National Posture Week takes its place on the calendar of public health education as it dramatizes the sound and ethical year-round program focusing the attention of the country on the significance of good posture as one element in good health and physical fitness.

Since no field is more subject to the dangers of "glamorizing" and lay "experting," the Institute in all its appeals stresses the necessity of "seeing your physician" as the first step in the improvement of poor body mechanics. Distribution of authentic literature through schools, colleges, medical and government bodies; and industrial, professional and civic public health groups is an important part of the program. Press and radio give serious coverage.

We hope to merit the continued cooperation of the medical profession during the first post-war observance of National Posture Week as peace presents its varied problems to those charged with maintaining the health of the nation.

FREE: These two heavily illustrated booklets on posture prepared especially for distribution by physicians to their patients. Their titles are: "The Human Back . . . its relationship to Posture and Health" and "Blue Prints for Body Balance." Ask for the quantity you need on your professional letterhead. **THE SAMUEL HIGBY CAMP INSTITUTE FOR BETTER POSTURE**, Empire State Bldg., New York 1, N. Y. Founded by S. H. This baby lets his doctor sleep

When the doctor prescribes 'Dexin' brand High Dextrin Carbohydrate, his little charges are likely to sleep more soundly and he himself gets a better rest. 'Dexin's' high dextrin content (1) diminishes intestinal fermentation with its tendency to colic and diarrhea, and (2) promotes the formation of soft, flocculent, easily digested curds. Infants rest more quietly and there are fewer late-night frantic phone calls.

'Dexin', not so sweet as to be unpalatable, is readily soluble in either hot or cold milk or other bland fluids. 'Dexin' does make a difference.

'Dexin' Reg. Trademark

'Dexin'
HIGH DEXTRIN CARBOHYDRATE

Composition—Dextrins 75% • Maltose 24% • Mineral Ash 0.25% • Moisture 0.75% • Available Carbohydrate 99% • 115 calories per ounce • 6 level packed tablespoonfuls equal 1 ounce • Containers of twelve ounces and three pounds • Accepted by the Council on Foods and Nutrition, American Medical Association.

QUININE IS AGAIN AVAILABLE

RESERVED exclusively for the use of our Armed Forces throughout the War, Quinine has now been released for civilian use as an antimalarial and therapeutic agent.

Merck & Co., Inc. contributed to the Wartime quinine program by supplying a substantial part of the Government's stock-pile from our reserve stocks. We also expanded our production facilities and continued the manufacture of Quinine and other Cinchona Salts for our Armed Forces and essential public health needs throughout the War.

We are pleased that we can again make Quinine available to the physician for the treatment of malaria and other conditions in which it has proved so effective.

POWDER AND LIQUID

PRESCRIBING BAKER'S MODIFIED MILK *Simplifies Infant Feeding Problems for Doctors!*

- for full-term and premature infants
- from birth to end of bottle feeding
- complementary to mother's milk, or exclusively

More and more doctors are getting better results through prescribing Baker's Modified Milk for most of their infant feeding cases. This is indicated by the increased use of Baker's, which is advertised only to the medical profession.

Busy doctors prefer to prescribe Baker's because of its efficacy, its wide application, and the simple directions required—just dilute with water, previously boiled.

Baker's is well tolerated by both full-term and premature infants, and can be used from birth until the end of the bottle-

feeding period, either complementary to or entirely in place of mother's milk, without any change in formula. The only change is increasing the quantity of each feeding as the baby grows older.

Mothers, too—and especially mothers of more than one baby—are enthusiastic about results from Baker's Modified Milk. Highly pleasing are the many letters received from thankful mothers extolling their physicians for prescribing Baker's.

Doctors and hospitals are invited to write for complete information about this highly nutritious food for infants.

• Baker's Modified Milk is made from tuberculin-tested cows' milk in which most of the fat has been replaced by animal and vegetable oils with the addition of lactose, dextrose, gelatin, iron ammonium citrate, vitamins A, B₁ and D. Not less than 400 units of vitamin D per quart.

"What ills from beauty spring"

—S. JOHNSON

Such may well be the sigh of the allergic woman whose undeserved penalty for employing standard cosmetics is a disfiguring contact dermatitis. Yet, she need not despair—because her physician can recommend the use of **ALMAY HYPOALLERGENIC COSMETICS**.

- Almay Cosmetics are high-quality preparations—the fruit of years of specialized, painstaking investigation and experimentation. Included among them are all the important beauty aids—lipstick, rouge, face powder, cold and hand creams, astringent, mascara, wave set and soap...both scented and unscented.

- For the unusual hyperallergic case, Almay provides Raw Material Testing Sets of Lipstick, Rouge and Face Powder (as well as Clinical Testing Sets of Lipstick)—and cooperates with the physician in developing individualized cosmetics when necessary.

The First Year

THE SUCCESSFUL NUTRITIONAL history of S-M-A babies is due to the remarkable similarity of S-M-A to mother's milk. It is essentially the same as human milk in percentage of protein, fat, carbohydrate and ash, in chemical constants of the fat and in physical properties.

S-M-A* IS RECOMMENDED for normal, full term infants in the early weeks of life when a supplementary food is required for the breast-fed infant. It may be given to infants of any age whenever the mother's milk is unavailable, of poor quality or insufficient quantity.

S-M-A is derived from the milk of tuberculin-tested cows. Part of the butter fat of this milk is replaced with animal and vegetable fats, including biologically assayed cod liver oil. Milk sugar, vitamin A and D concentrate, carotene, thiamine hydrochloride, potassium chloride and iron are added. *REG. U. S. PAT. OFF.

Supplied: 1 lb. tins with measuring cup.

*Similar to
human milk*

★The name is never abbreviated;
and the product is not like any
other infant food—notwithstanding
a confusing similarity of names.

The fat of Similac has a physical and chemical composition that permits a fat retention comparable to that of breast milk fat (Holt, Tidwell & Kirk, *Acta Paediatrica*, Vol. XVI, 1933) . . . In Similac the proteins are rendered soluble to a point approximating the soluble proteins in human milk . . . Similac, like breast milk, has a consistently ZERO curd tension . . . The salt balance of Similac is strikingly like that of human milk (C. W. Martin, M. D., *New York State Journal of Medicine*, Sept. 1, 1932). *No other substitute resembles breast milk in all of these respects.*

A powdered, modified milk product especially prepared for infant feeding, made from tuberculin tested cow's milk (casein modified) from which part of the butter fat is removed and to which has been added lactose, olive oil, coconut oil, corn oil and fish liver oil concentrate.

SIMILAC }

Yes, Doctor, our World is

SHRINKING!

As we have reduced the time and difficulties of travel to all parts of our global world, organisms long associated with various strange localities have insidiously spread until today we may find so-called "tropical" diseases right in our own backyard.

Amebic dysentery is a major public health problem in our country today.* Epidemics in recent years remove amebic colitis from the tropical or sub-tropical grouping.

VIOFORM

CIBA'S POTENT AMEBACIDE

Free from toxicity or intestinal irritation, VIOFORM is the ideal choice in treating cases where dysentery is clinically evident and in symptomless carriers. Two or more courses, with intermission of one week, are usually advisable. Recommended dose: one tablet (250 mg.) three times daily for ten days.

PENICILLIN

... IN SUBACUTE BACTERIAL ENDOCARDITIS

Penicillin is the best agent available for the treatment of this devastating disease. Although in a few instances it may be desirable to use the continuous intravenous route, intramuscular injection is the one of choice. If best results are to be obtained 200,000 to 300,000 units should be given daily for three weeks or longer. (Keefer, C. S. et al.: New Dosage Forms of Penicillin, J. A. M. A. 128:1161, Aug. 18, 1945.)

Bristol Penicillin, because of its low toxicity and freedom from pyrogens, as well as its absolute sterility and standard potency, provides dependable therapeutic action.

The rapidly developing new clinical uses of this potent antibiotic are abstracted in issues of the *BRISTOL PENICILLIN DIGEST*. If you are not receiving *your copies* regularly, drop us a line.

Benzedrine Sulfate—formerly supplied
in tablet form only—is now available also as:

BENZEDRINE SULFATE ELIXIR

Benzedrine Sulfate Elixir, N.N.R.—highly palatable,
pleasant in appearance and easily tolerated—
is identical in action with Benzedrine Sulfate Tablets.
It is a preferred form of administration for invalids,
convalescents, children and the aged. This new
preparation contains Benzedrine Sulfate
(racemic amphetamine sulfate, S.K.F.),
2.5 mg. per 5 cc. (1 teaspoonful);
and has the same pharmaceutical properties
as low-alcoholic, mildly acidic elixirs.

NOTE: When you next write for Benzedrine
Sulfate, please remember to specify
which of the two dosage forms
you wish to prescribe—
'Tablets' or 'Elixir'.

an important word
in estrogenic therapy

Estrogens are excreted by the kidney not as free chemical compounds but as *conjugates*. Equine estrogens...estrone, estradiol, equilin, equilenin and hippulin are eliminated as sulfates, the *conjugated* form.

In "PREMARIN", the *conjugated* estrogens are carefully protected against hydrolysis to retain their highly desirable characteristics . . . water solubility . . . dependable oral activity . . . high therapeutic effectiveness. An extensive bibliography on "PREMARIN" attests to its comparative freedom from toxicity and to the fact that treatment is usually followed by a general feeling of well-being.

YOU CAN'T OVERRATE THE VALUE OF CONTROL

Everyone can see the need for control measures against obvious dangers. But dramatic and constant campaigning is necessary to win public support in the fight against the unseen menace

of cancer. Interest must be awakened and education conducted to enlist the public co-operation requisite to success. This challenging work is the responsibility of the Field Army of the American Cancer Society.

To give appropriate significance to these efforts and to focus nation-wide

attention on this vital problem, Congress has designated April, "Cancer Control Month." And again this Spring, as in each drive spearheading the next year's activities, the Field Army's straightforward appeal to all Americans is: "GIVE, to Conquer Cancer."

Once more, over 10,000 Rexall Drug Stores across the country unite in behalf of this cause. Urging Americans to heed the Society's plea, these stores contribute facilities for distribution of literature cautioning "Consult your doctor" at the first moment of cancer's "danger signals."

From a great diversity of domestic and foreign medical publications, there is brought together, in the *Quarterly Review of Obstetrics and Gynecology*, a most comprehensive presentation of all the significant advances in obstetrics, gynecology, endocrinology, and related fields. This is compiled through a systematic review of the medical literature of the entire world. All of the essential details of the new diagnostic methods and tests, as well as every new medical and surgical procedure, are presented so that the busy practitioner may safely and successfully employ these newer methods in his own practice. The world-wide reputation of the *Quarterly Review* is founded upon the fact that for three years each issue has brought to the busy specialist or general physician highly important advances in clinical obstetrics and gynecology, which otherwise may not have been so readily available. Every page of each issue presents articles of first-rate importance, selected from hundreds of publications, because they include so many vital facts which every obstetrician and gynecologist should know. All of this helpful information is classified and presented in the following sequence for easy reading and quick reference:

OBSTETRICS

Physiology of Pregnancy
 Physiology of Labor
 Physiology of Puerperium
 Hygiene and Management of Normal Pregnancy,
 Labor and Puerperium
 Physiology and Care of Newborn
 Pathology of Pregnancy
 Pathology of Labor
 Pathology of Puerperium
 Pathology of Newborn
 Operative Obstetrics
 Social and Legal Aspects

GYNECOLOGY

Endocrinology
 The Menstrual Cycle
 Physiology and Pathology of the Vulva
 Physiology and Pathology of the Vagina
 Physiology and Pathology of the Uterus
 Physiology and Pathology of the Ovary
 Physiology and Pathology of Tube and Adnexa
 Female Urology
 Venereal Disease
 Operative Technique; Anesthesia
 Radiation Therapy
 Sterility
 Miscellaneous

Each issue contains a cross reference subject index as well as an index of authors. A cumulative cross reference subject and authors index is included in the last number of each volume.

The Quarterly Review of Surgery provides a systematic plan, organized for the purpose of making available a concise and authoritative presentation of the current progress, trends, and attitudes in all branches of surgery. Compiled from every dependable source, this plan covers all state, national, and special journals as well as the bulletins, reports, etc., of the clinics and hospitals. Presented briefly but without sacrificing any essential detail, these highly significant data are further enhanced by comments of the members of the Editorial Board, based upon and summarizing their own clinical experiences as well as those of other recognized authorities. All data are classified and published under the following headings:

- | | | |
|-----------------------------------|-----------------------------|--------------------------|
| 1. Anesthesia and Analgesia | 20. Mediastinum | 39. Gynecologic Surgery |
| 2. Pre- and Postoperative Therapy | 21. Heart | 40. Vascular Surgery |
| 3. Surgical Technic | 22. Esophagus | 41. Arteries |
| 4. Surgical Infections | 23. Breast | 42. Veins |
| 5. Tumors | 24. Diaphragm | 43. Orthopedic Surgery |
| 6. Neurosurgery | 25. Abdominal Surgery | 44. Fractures |
| 7. Skull | 26. Abdominal Wall | 45. Dislocations |
| 8. Brain | 27. Hernia | 46. Bones |
| 9. Spine and Spinal Cord | 28. Peritoneum | 47. Joints |
| 10. Peripheral Nerves | 29. Stomach and Duodenum | 48. Tendons |
| 11. Sympathetic Nervous System | 30. Small Intestines | 49. Amputations |
| 12. Head and Neck | 31. Appendix | 50. Traumatic Surgery |
| 13. Oral Surgery | 32. Colon and Rectum | 51. Burns |
| 14. Plastic Surgery | 33. Intestinal Obstruction | 52. Shock |
| 15. Thyroid and Parathyroid | 34. Anus | 53. Transfusions |
| 16. Thoracic Surgery | 35. Liver and Biliary Tract | 54. Wounds |
| 17. Chest Wall | 36. Pancreas | 55. Military Surgery |
| 18. Pleura | 37. Spleen | 56. Experimental Surgery |
| 19. Lung | 38. Genitourinary Surgery | 57. Miscellaneous |

The scientific excellence of this work, the reconciliation of conflicting views and the true evaluation of each new method is assured through the "Comments" of the members of the Editorial Board. For at the conclusion of most articles these eminent authorities present in clear, concise *post-graduate* discussions their own successful methods and bring into perspective the best work of all recognized authorities. Thus, all surgeons, everywhere may safely make decisions based upon the sound premise that the combined clinical experiences of many authorities is superior to any one alone. This inevitably leads to improved surgical procedure, lowered mortality rates, and, at all times, the self-assurance which comes only of possessed knowledge—of knowing beyond doubt the "what to do" as well as the "what not to do" in every surgical condition.

The most comprehensive presentation of current surgical data available, concisely compiled and expertly indexed, with an annual cumulative cross reference index so that one may turn instantly to "today's last word" on every surgical topic. The Quarterly Review of Surgery is published in November, February, May and August. Annual subscription rate is nine dollars.

WASHINGTON 6, D. C.

Quarterly Review of Urology

HUGH J. JEWETT, M.D., Editor-in-Chief, *Johns Hopkins University*

EDITORIAL BOARD

WILLIAM F. BRAASCH, M.D.	<i>Mayo Clinic</i>	AUSTIN I. DODSON, M.D.	<i>Medical College of Virginia</i>
FLETCHER COLBY, M.D.	<i>Harvard University</i>	FRANK HINMAN, M.D.	<i>University of California</i>
EDWIN G. DAVIS, M.D.	<i>University of Nebraska</i>	CHARLES HUGGINS, M.D.	<i>University of Chicago</i>
ARCHIE L. DEAN, M.D.	<i>Cornell University</i>	REED NESBIT, M.D.	<i>University of Michigan</i>
CLYDE L. DEMING, M.D.	<i>Yale University</i>	WINFIELD W. SCOTT, M.D.	<i>University of Rochester</i>

The Quarterly Review of Urology is designed to present in a concise and authoritative manner not only all progress in the field of Urology alone, but also important developments in other branches of Medicine, which are or may become of urologic significance. For a single individual to keep abreast of this mass of material, in which Urology is often inextricably intertwined with other clinical and preclinical sciences, heretofore has been impossible.

The members of the Editorial Board are charged with the responsibility of selecting from every dependable source all contributions which in their judgment are of fundamental importance and unusual merit, to which they may add their own comments. This material is classified under the following headings:

- | | |
|--|--|
| 1. Nutrition and Metabolism | 15. Scrotum |
| 2. Pre- and Postoperative Therapy | 16. Testis |
| 3. Anesthesia | 17. Epididymis |
| 4. General Surgical Technique | 18. Spermatic Cord and Vas |
| 5. Infections, Parasites, Toxins and Drugs | 19. Seminal Vesicles and Ejaculatory Ducts |
| 6. Calculus | 20. Prostate and Verumontanum |
| 7. Hemorrhage and Shock | 21. The Musculo-Skeletal System |
| 8. Anomaly | 22. The Respiratory System |
| 9. Kidney and Capsules | 23. The Cardiovascular System |
| 10. Ureter | 24. The Hemic and Lymphatic Systems |
| 11. Bladder and Urachus | 25. The Digestive System |
| 12. Urethra and Glands | 26. The Endocrine System |
| 13. Penis | 27. The Nervous System |
| 14. Urine | 28. Cancer Research |
| | 29. Urologic Armamentarium |

Each anatomic division includes Embryology, Pathology, Diagnosis, and Treatment, and some also embrace Biochemistry, Physiology, and Pharmacology. At the end of each division there will be references to current articles not abstracted that may be useful to authors in the compilation of their bibliographies.

From a great diversity of domestic and foreign journals there is brought together in the Quarterly Review of Urology a most comprehensive compilation of all the significant advances in every branch of urology. All of the essential details of the new diagnostic methods and tests, as well as every new therapeutic procedure are presented so that the busy practitioner may safely and successfully employ these new methods in his own practice. Especial attention will be given to the illustrations to depict modifications and advances in surgical technique. In medical therapy and chemotherapy, etc., exact dosages, indications and contra-indications will be so presented that the reader will have specific informative clinical assistance that will not require further reference. Each issue of the Quarterly Review of Urology will contain a classified table of contents, a cross reference subject index and an authors index. The concluding number of each volume will include a cumulative cross reference subject and authors index so that all of this vital information may be quickly available.

Today, there are 3 types of insulin...

THE PHYSICIAN now has a new intermediate-acting type of insulin with which to treat his diabetic patients—'Wellcome' Globin Insulin with Zinc. Originally there was only quick-acting, short-lived insulin. Then came a slow-acting, long-lived form. And now with Globin Insulin he has a moderately rapid-acting agent which persists for sixteen hours or more, enough to cover the period of maximum carbohydrate intake. This activity is sufficiently diminished by night to minimize nocturnal reactions. Physicians will do well to consider the advantages of this new third insulin for their diabetic patients.

'Wellcome' Globin Insulin with Zinc is a clear solution, comparable to regular insulin in its freedom from allergenic properties.

Accepted by the Council on Pharmacy and Chemistry, American Medical Association. Developed in the Wellcome Research Laboratories, Tuckahoe, New York. U.S. Patent No. 2,161,198. Available in vials of 10 cc., 80 units in 1 cc., and vials of 10 cc., 40 units in 1 cc. Literature on request. 'Wellcome' trademark registered.

SPENCER INDIVIDUALLY DESIGNED SUPPORTS
For Abdomen, Back and Breasts

For Acidity and Allied Conditions, we suggest ADAMS SPRINGS MINERAL WATER

● MANY physicians recommend the water in conjunction with the treatment of stomach, liver and kidney trouble.

ADAMS MINERAL SPRINGS is one of the seven known iron and manganese bi-carbonate springs in the world, and the only one in Western America.

It is not a cure-all, but it overcomes acid excesses in the body, and is a very mild but wonderfully effective eliminator. The bowels function without spasm, the kidney output is greatly increased, and there is marked drainage of bile from the gall bladder and liver.

There is also some constitutional upset for a few days, particularly in gall bladder cases. But this is soon over and your patient begins to show improvement and is now in condition to profit by any medication you may prescribe. If the case is an operative one, you have improved your patient and made of him a better risk.

We will be pleased to cooperate in any way whatever, and samples of water are yours for the asking.

A Natural Mineral Water

CASE HISTORY OF WHAT HE DID IN THE INFANTRY

Lieutenant ———, medical corps, with infantry in Philippines. Rugged conditions not ideal for practice of medicine. Wounded by bomb fragment, hospitalized, then discharged. Interest in setting up own practice; had some money but not enough to get started. Informed that "G. I. Bill of Rights" guarantees 50%, or \$2,000, of certain business loans to veterans. Visited Bank of America, found complete lending service, offering sound credit. Under Bank of America **Vet-loan Plan**, which supplements "G. I. Bill," was extended credit totaling \$4,600. Now established in own office. Convenient monthly **Vet-loan** payments arranged.

Internes and medical students: Even though you may not be a veteran, if you are considering group practice or an office of your own, Bank of America invites you to drop in at any branch and talk over your plans. Sound financing may be arranged through a **Timeplan** loan.

"How to Have a Business" and "Term Loans for Small Business" are two helpful Bank of America booklets which you might like to read. They are yours for the asking at any branch.

The Intrinsic Ingredient...

Every exceptional product or service
has an intrinsic ingredient without which
it would become dross or ordinary.

in Professional Protection

Specialized Service—our exclusive
application to this one field—brings that
extra “know how” to the defense of
malpractice actions which has always
distinguished Medical Protective. It is
the Intrinsic Ingredient.

Most DEPENDABLE Method

The combined use of an occlusive diaphragm and vaginal jelly remains, in the published opinions of competent clinicians, the most dependable method of conception control.

Dickinson¹ has long held that the use of jellies alone cannot be relied upon for complete protection. It is noteworthy that in the series of patients studied by Eastman and Scott², an occlusive diaphragm was employed in conjunction with a spermicidal jelly for effective results. Warner³, in a carefully controlled study of 500 patients, emphasized the value of a diaphragm.

In view of the preponderant clinical evidence in its favor, we suggest that physicians will afford their patients a high degree of protection by prescribing the diaphragm and jelly technique.

You assure quality when you specify a product bearing the "RAMSES"* trademark.

ECONOMICAL... BECAUSE IT'S FORTIFIED!

S·X·12

...the Double Duty Douche

Rx Alum, Thymol, Lactose, Eucalyptol, Peppermint, Salicylic Acid, Phenol, Menthol, Boric Acid, Zinc Sulphate, Tartaric Acid, Sodium Perborate.
Buffered to a P. H. of 4.0

S·X·12 is generally prescribed whenever a soothing, cooling or deodorant vaginal douche is indicated, particularly for the soreness and itching caused by *Trichomonas*.*

S·X·12 is also useful as a dry dressing for minor cuts and abrasions. It affords relief for tired feet as a dusting powder or bath.

Other Servex Products Include:

FOR FERTILITY CONTROL

Servex Powder Set

Servex Combination Set

Servex Jelly Tube Set

Servex Diaphragms

FOR INFECTION

Servex Trich Set

Servex Germicidal Soap

*When used in conjunction with the treatment of vaginal infections the reason for an acid reacting douche such as S-X 12 becomes apparent, as the pH of the vaginal mucosa is then typically alkaline and the normal flora of Doderlein bacilli is absent or reduced. S-X 12 is helpful in this condition, particularly when used with the Servex Trich Powders Nos. 1 and 2.
